

WHEEL CHOCKS

GRIPCHOCKS

Developed specifically for commercial and military use, the unique Gripchock represents the ultimate in rugged, reliable equipment.

Constructed in tough long-life rubber, Gripchocks offer major advantages over traditional wood or metal chocking systems. The use of such an ideal material combines maximum ground grip with unrivalled resilience to the rigours of constant handling.

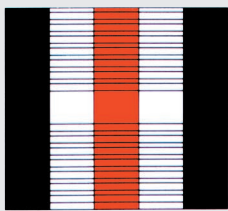

RUBBER WHEEL CHOCKS

- All rubber construction for optimum GRIP and LIFE with strong polythene handling rope
- Wide range of sizes and widths - 4 sizes up to 7 segments width
- Wheel conforming flexibility under load due to equilateral triangular shape and unique internal design
- Deeply ribbed for maximum grip on concrete and tarmac
- Rounded corners to avoid wheel trapping
- Colour segmented for prestige identity (optional)
- Moulded with individual clients name (optional)
- Used by civil airline and air forces worldwide
- Quick delivery to customer requirements, anywhere

Bonded polyurethane paint is used and any colour combination is available. Cat's eyes (red)

SOLID RUBBER WHEEL CHOCKS

Headset Services Limited supply solid rubber wheel chocks which are suitable for all applications within the aviation and road transport industries.

They are extremely hard wearing and are produced from a specially formulated rugged rubber compound that is ideally suited to withstand the harsh conditions of these demanding industries. The triangular chocks are rounded at the corners to prevent profile damage and are heavily ribbed on all three sides to aid grip.

They are available in 2 sizes: Standard and Jumbo - Both come with a rope for carrying and ease of use.

Fittings: 300mm Eyebolt, through 2 x 50mm washer bolted through the centre fitted with 1 metre of rope.

Colour - Black.

STANDARD WHEEL CHOCKS

Standard chocks are supplied with a fitted 300mm eyebolt and length of rope which serves as a removal aid.

Weight: 5.30Kg
Length: 250mm
Height: 150mm
Width: 170mm

Code: *HSMP1602*

JUMBO WHEEL CHOCKS

Jumbo chocks are supplied with a fitted length of rope which serves as a removal aid.

Weight: 11.34Kg
Length: 250mm
Height: 220mm
Width: 235mm

Code: *HSMP1601*
